

I object to the preempting of regular programming by the Sinclair Networks in order to air an anti Kerry program, purportedly a smear type of document much like the discredited "Swift Boat" smear. They use the public airways and have a public trust and this preempting propaganda-like program is not in keeping with that trust. I believe that the FCC must enforce the existing laws concerning the use of the public's airways in this partisan way. Sincerely Moisy Shopper, M.D.
